## Recommendation for Veljko Simovic and his Profesional+ agency

We know each other for many years now through personal contact and have worked together on several occasions. After many discussions our first cooperation started in 2009 with a good analysis of a planned project and its needs in order to be started successfully as a an online project accompanying a film.

On other occasions we went into discussion of a public presentation project we developed as a complex website. This was well managed and technically supervised by Veljko Simovic and his team in order to deliver just in time solutions for our purposes. Eventually this became a multilingual intercultural project „Shine Power concerts“. Other projects followed, especially to mention the Woodcube site.

It's important to say that Veljko Simovic / Profesional+ always were of great help with web development tasks, with advice, practical and technical support. If there was a design issue involved they would recommend and bring in competent network partners from all around the world to deliver the best service to us. We are very grateful for their support and will cooperate again if future projects require their kind attention.

We wish you a successful business now and in the future!

Joerg Altekruse  
CEO
