

**Testimonial for Profesional+**

Veljko and the team at Profesional+ provided me with excellent support and a quality service to get my website both functionally and aesthetically fit-for-purpose.

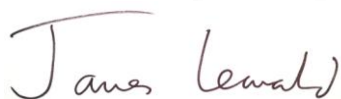

He made the effort to come and visit me, listened attentively to what I had to say, and led me clearly through his decision-making process to meet with my wishes. But he was also mindful to advise me of things that would and would not work on my website.

The service was excellent value-for-money, particularly taking into account the addition of a free tutorial, with supporting guidance, on how I can make swift changes to my website, using the Wordpress format, without the need to pay for further designs and alterations.

He also advised me on my whole web approach - the integration of LinkedIn, twitter, Facebook and Google circles - which will prove vital in helping me win new business.

I am happy to recommend him to others, who are keen to build and develop not only their websites, but their whole web presence.

James Leavold, CEO
